# DATA CENTER DESIGN & BUILD SOLUTIONS

We are a single point of contact for all of your data center infra-structure and environmental needs.

Camali Corp provides data center Design, Engineering and Construction to keep your business thriving. The data center Design process begins with a detailed assessment of your unique requirements, including physical and functional. Each complex data center construction project has their own engineering challenges and Camali can accommodate for them. We believe in safety for your employees and for ours, which is a priority throughout the data center installation project. Installations are scheduled to minimize any disruptions to your day-to-day operations. Once the project is completed, we provide ongoing preventative maintenance and data center disaster recovery activities to keep facilities and server environments running at optimal efficiencies.

## DATA CENTER SERVICES & PRODUCTS

### COMPUTER POWER

- Uninterruptible Power Supplies (UPS)
- Power Distribution Units (PDU)
- Power Whips (Sealed Tight Flex Computer Power Cables)
